After-study

How were the colors of the font, background and designs? Did they clash? Were they aesthetically pleasing?	Was the layout of the website easy to use? Did it provide clear concise options?	Was the functionality of the website easy to use? (Were the buttons clear in functionality and did it perform the proper process when clicked)	Was the website descriptive of what the deliverable or function of it was?	Is there any suggestions for functions to be added that would enhance the experience?	How would you rate the usefulness or overall usability this may provide to society? [1-10]	And why?
I enjoy the dark background however I don't like the linear layout of the website right now.	Yes it was very simple however it might be too simple.	Yes the buttons were easy to use and not complicated at all.	Yes the website gave us a clear purpose of what it does.	I would add a contact us button in order to provide feedback.	8	
The colors were aesthetically pleasing. No they did not clash. The design was simple and modern.	Yes. Yes it provided clear options.	The buttons were not working or functioning, but the layout of the buttons made it easy to find and very intuitive.	Yes.	No suggestions.	7	I would only use such an application for specific occasions, not something I would use on a daily basis. The application concept is a good idea.
The colors are simple but look good. They are very aesthetically pleasing.	The layout of the website was easy to use. It is a simple long page with sections separated linearly. It provides clear	The functionality of the website seems easy to use. Right now it has nothing to do when clicked.	Yes it was.	No suggestions.	8	

	concise options as well.					
From website prototype, they were basic and easy to differentiate.	It was easy to look at, but a short tutorial may be needed when full functionality come into play.	There was no functionality yet, but seemed relatively straight forward from described buttons.	The website provided a clear purpose that would apply to large market in society.	Maybe a help drop down or simple tutorial to walk you through first time usage to get the full effect of all the features.	9	Creative idea; it justs needs some explanations and walkthroughs
I don't think they clash I think the colors complement very well. They were aesthetically pleasing	It is a little wordy but the layout is organized and well divided	Yes all buttons have a good description of what they do and are organized well in the layout	In my opinion the service is to find music around you and have events and musics suggested based on your location and what you like	I think it would be good to add a functionality kind of like what pandora does that it suggest you music based on your past clicks	9	I am very interesting in music around me and finding new artists based on my taste so I think this service could be very useful

How were the colors of the font, background and designs? Did they clash? Were they aesthetically pleasing?

5 responses

I enjoy the dark background however I don't like the linear layout of the website right now.

The colors were aesthetically pleasing. No they did not clash. The design was simple and modern.

The colors are simple but look good. They are very aesthetically pleasing.

From website prototype, they were basic and easy to differentiate.

I dont think they clash I think the colors complement very well. They were aesthetically pleasing

Was the layout of the website easy to use? Did it provide clear concise options?

5 responses

Yes it was very simple however it might be too simple.

Yes. Yes it provided clear options.

The layout of the website was easy to use. It is a simple long page with sections separated linearly. It provides clear concise options as well.

It was easy to look at, but a short tutorial may be needed when full functionality come into play.

It is a little wordy but the layout is organized and well divided

Was the functionality of the website easy to use? (Were the buttons clear in functionality and did it perform the proper process when clicked)

5 responses

Yes the buttons were easy to use and not complicated at all.

The buttons were not working or functioning, but the layout of the buttons made it easy to find and very intuitive.

The functionality of the website seems easy to use. Right now it has noting to do when clicked.

There was no functionality yet, but seemed relatively straight forward from described buttons.

Yes all buttons have a good description of what they do and are organized well in the layout

Was the website descriptive of what the deliverable or function of it was?

5 responses

Yes the website gave us a clear purpose of what it does.

Yes.

Yes it was.

The website provided a clear purpose that would apply to large market in society.

In my opinion the service is to find music around you and have events and musics suggested based on your location and what you like

Is there any suggestions for functions to be added that would enhance the experience?
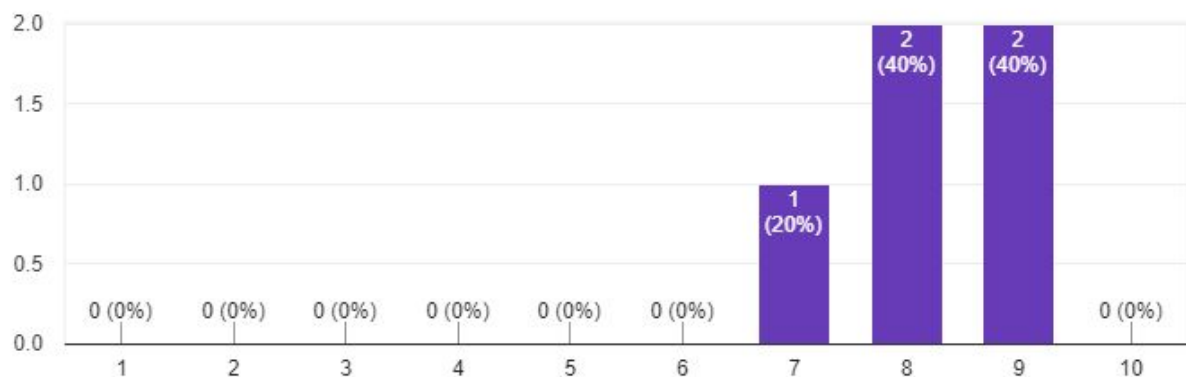

5 responses

No suggestions. (2)

I would add a contact us button in order to provide feedback.

Maybe a help drop down or simple tutorial to walk you through first time usage to get the full effect of all the features.

I think it would be good to add a functionality kind of like what pandora does that it suggest you music based on your past clicks

How would you rate the usefulness or overall usability this may provide to society? [1-10]

5 responses

And why?

3 responses

I would only use such an application for specific occasions, not something I would use on a daily basis. The application concept is a good idea.

Creative idea; it justs needs some explanations and walkthroughs

I am very interesting in music around me and finding new artists based on my taste so I think this service could be very useful
